Description

The **11th Bioproduction Congress (BioPC2026)** will be held on September 22nd-23rd, 2026 in Lyon, France.

The **Bioproduction Congress (BioPC)** is the annual event of the biopharmaceutical production sector where stakeholders from Europe gather together to showcase and exchange the latest innovations in bioprocessing. This dynamic event promotes exchanges on the future of biomanufacturing, addresses the current challenges and showcases new breakthrough solutions.

This event will bring together experts from companies (big pharmas, SME and Startups) and laboratories developing therapeutic candidates as well as leading bioproduction professionals to accelerate therapeutics drugs such as mAbs, vaccines, cell therapy and novel products into commercial manufacturing. It will include scientific lectures with the latest innovations in the field, a Breakthrough Innovation Pitch session and a Posters session to present new projects and services that go beyond traditional approaches from both academia and industry. Moreover, the event will also include parallel workshops, an Exhibition Hall to showcase new technologies and a partnering platform to promote exchanges.

Key words: analytical tools, bioprocessing, Multi-attribute Method (MAM), developability, monoclonal antibody, vaccines, cell therapy, gene therapy, mRNA-based technology, process characterization, process analytical technology (PAT), cross-cutting technologies, CQAs, QC, viral clearance, dual sourcing, cell line stability.

Venue: Groupama stadium, Lyon

Address: 10 Avenue Simone Veil, 69150 Décines-Charpieu, Lyon | France
